# Use & Care

Croma Laminates are designed to last a long time with proper care and usage. Below are some guidelines on how to maintain and care for your laminates.

▶ **Selecting the correct finish**

We recommend to consider the application and use of the surface before selecting the laminate. Standard General Purpose Grade laminates are suitable for most interior use. Textured surfaces can be used for both vertical and horizontal applications. Gloss and metal laminates are not recommended for heavy-duty applications such as counter tops.

▶ **Cleaning**

Croma Laminates are very easy to maintain and clean. For cleaning of stains and routine laminate maintenance, use a clean, damp, non-abrasive cloth and mild detergent or soap. Avoid the use of strong chemicals such as bleach, organic detergents and abrasive sponges that can discolour and scratch the laminate surface. For grease stains or attached dirt, clean with a 50-50 mix of solvent and alcohol using a clean, non-abrasive cloth. This way, the laminate will be free of stains without affecting the original colour and design.

▶ **Protection against scratch and impact**

Croma Laminates are resistant to scratches and impact under normal use conditions. If any cutting activities are to be done on the laminate surface, an appropriate cutting board should be used to avoid damage to the laminate surface. It is also not recommended to chop, slice, pound or hammer directly on the laminate.

▶ **Protection against heat and light**

Croma Laminates are manufactured for indoor applications and should not be exposed to sunlight or temperatures above 130°C. When placing hot objects such as frying pans, pots, and iron, use a trivet or protective insulated material to protect the laminate surface against direct heated objects.

▶ **Protection against chemicals**

Croma High Pressure Laminates are not recommended for laboratory applications where oxidized chemicals, alkali and strong acids are used. Cleaning agents that contain acid, alkali or sodium hypochlorite should not be used for maintaining the laminate surface.
