Our story

At Yale, we have a 180 year history of trusted innovation.

Everything we are today, we owe to the inspirational ingenuity of Linus Yale Senior and Linus Yale Junior. The Yale lock tradition started around 1840 when Linus Yale Senior opened up a lock shop specialising in expensive handmade bank locks. Inspired by a 4,000 year old Egyptian wooden lock, he built the first models of the pin-tumbler lock he had developed.

To manufacture them, he built a small lock factory in Newport, USA in 1847. His son, Linus Yale Junior, took up his father's trade. Technically very talented and with a number of ground-breaking inventions, he made his father's pin-tumbler lock design suitable for mass production in the early 1860s and changed the industry forever.

Linus Yale Junior and his colleague, Henry Towne, established the Yale & Towne Company in Stamford, Connecticut in 1868. By the early 20th Century, they employed more than 12,000 people and had expanded globally. Even today, the pin-tumbler lock by Linus Yale Junior is the most widely used type of door lock in the world.

Part of ASSA ABLOY Group since 2000, Yale is the leading residential brand of the Group.

Beside the world's most widely used type of door lock, Yale has produced numerous other innovative products such as digital door and cabinet locks, alarms, safes, doors, windows, access systems and hardware for doors and windows.

Yale is the brand behind locks of every design and function in over 125 countries.

All over the world, we're trusted to make homes secure and people feel secure, too.

Trusted every day since 1840

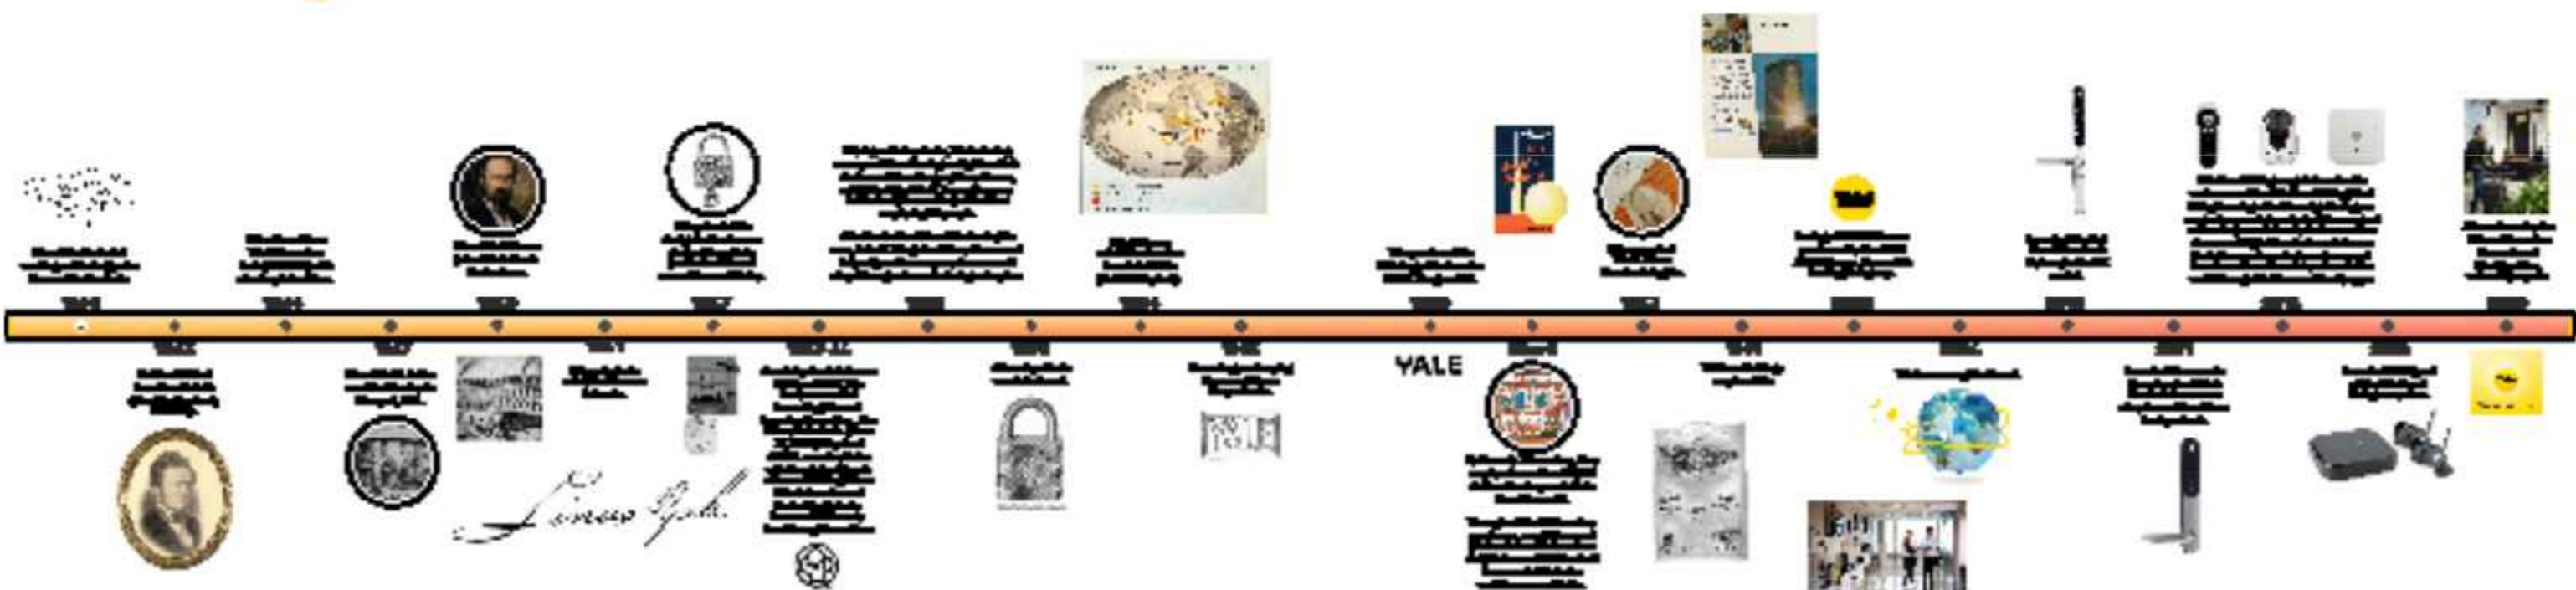

Yale is trusted by millions of people every day to keep what's important to them safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes.

Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

Today, and every day to come.

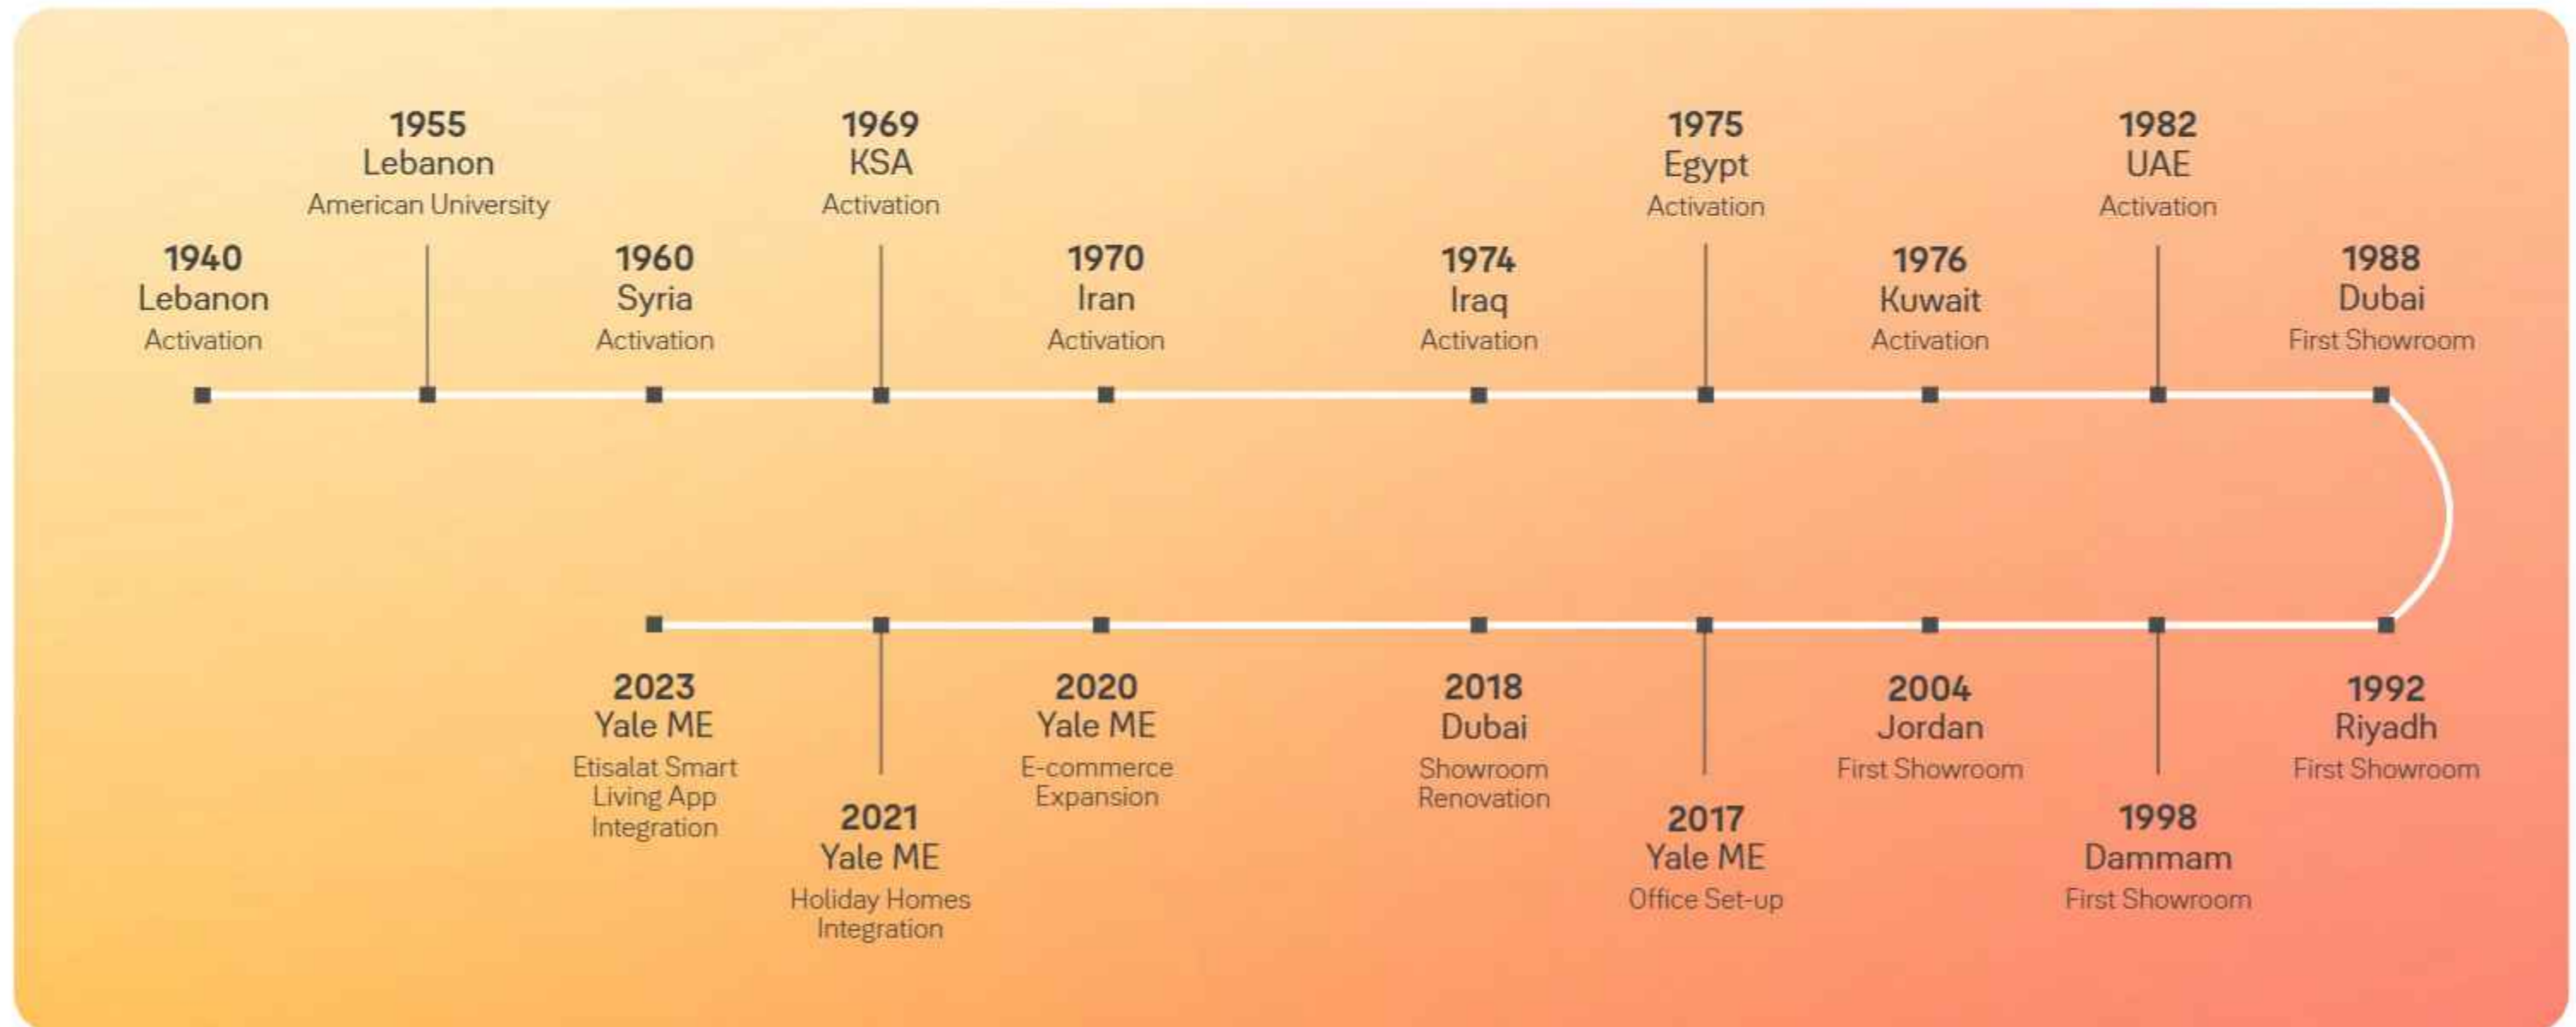

Yale in the Middle East

Yale Middle East is the market leader in residential security solutions and offers an extensive range of products catering to the varied demands of the market. The products are handpicked from millions of product combinations globally, ranging from mechanical locks, smart products like alarms and cameras to door solutions and connected smart locks; and adapted to meet the diverse needs of consumers across the Middle East region.

Yale first set foot in the Middle East with Lebanon in 1940, and today, has physical presence in 14 countries through some of the region's top distributors, and online presence with key ecommerce accounts.

Yale Middle East not only offers its customers high quality products, but also ensures they enjoy an excellent after-sales experience. With an expert team of professionals trained on the latest products and technology, and a warranty period of 1-10 years across its products, Yale aims to instill trust and a sense of security for its consumers across the region, as these values are at the core of what we do.

Our customer care team is available for installation services and technical support - please call our toll free number 800 YALE (9253) or scan the QR code below to book your installation online.

The Yale Home Ecosystem

For a seamless home security experience.

The Yale Home app enables you to connect and control all your Yale smart security devices (Yale Smart Locks, Yale Smart Alarm, Yale Smart Storage solutions and Yale Smart Gate and Garage Opener) from a single app.

*Coming soon

The Yale Home app functionalities

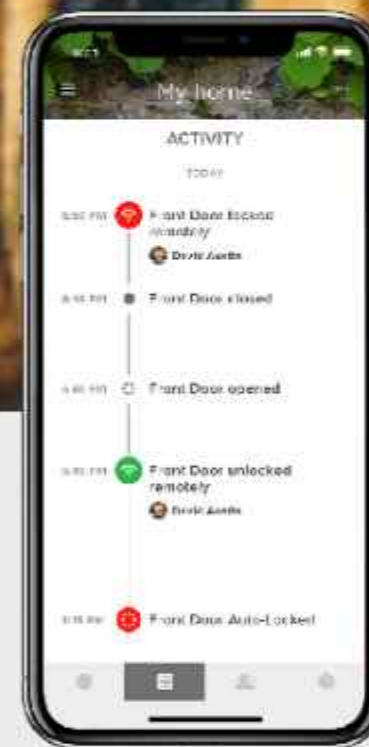

App control

Lock and unlock your door from your app, anywhere in the world.

DoorSense™ technology

The lock will check the status of the door and tell you if your door is securely closed and locked.

Activity monitoring

See who comes and when with the Activity Feed. Check who unlocked the door and if or when it was actually opened. Set-up alerts to notify when specific people arrive home.

Guest access

Grant unlimited virtual keys valid for a few weeks, a few hours, or a few minutes. Never worry about lost or stolen keys again.

Smart together

Connect your Smart Lock with leading smart home systems, voice assistants and holiday rental platforms for effortless lock control and access management.

What would you like to do?

Auto-lock and Unlock without keys

The auto-lock feature can automatically lock your door when you leave home. When you return and walk to your door, auto-unlock will then unlock it again thanks to geo-fencing.

Create virtual guest keys

Expecting guests? Welcome them with a temporary virtual key before they arrive. Time-specific access makes check-in and check-out for holiday rentals simple and secure.

Know who's coming and going

Know the ins and outs of your home with an Activity Feed that lets you know the cleaner has arrived, your kids are home safe and the dog has been taken out for a walk.

Voice assistant integration

Make it smart - together with trusted voice assistant partners, you can ask Alexa, Siri or the Google Assistant to lock, unlock (with a PIN) and check whether or not the door is locked.

Linus[®] Smart Lock

App control

Manage access to your home from anywhere with the Yale Home app*

Easy installation

Fits a wide range of doors

App control

Auto-lock and unlock when you're nearby

- Remote functionalities (Yale Connect Wi-Fi Bridge required)*
- Guest management
- Activity monitoring & notifications
- DoorSense™ technology: know when your door is closed or left ajar
- The adjustable cylinder is needed for doors without suitable euro cylinders
- Smart Watch compatible
- Low battery notification
- Mechanical key override
- PIN code access (Yale Keypad required)

Lock compatibility	Fits a wide range of doors - Is your lock compatible? Please visit the Compatibility Checker page on our website for recommendations on the cylinder options that are available in your country.
Product dimensions	H150 x W58 x D58 mm
Requirements	Free Yale Home app for iOS or Android smartphone
Communication frequency between Linus* and accessories	Bluetooth version: 4.2 - 2.4GHz
Technology between the Linus* Lock and smartphone	Bluetooth directly or via Bluetooth and Wi-Fi if a Yale Connect Wi-Fi Bridge is paired.
Two-factor security	Your Yale Home account is protected with 2-factor authentication, which means that on top of your password, the system will check your identity based on either an email or phone number.
Encryption	The Linus* Smart Lock uses Bluetooth Low Energy (BLE) technology encryption, as well as AES 128 bit and TLS encryptions, commonly referred to as bank level security.
Battery type	4xAA (Alkaline recommended) for the Smart Lock. Batteries included in the kit.
Finish options	Silver & Black

Yale Home

*Requires Yale Connect Wi-Fi Bridge for locking/unlocking remotely and voice assistants (sold separately).

Yale Connect Wi-Fi Bridge

For functionalities such as locking/unlocking your door remotely, instant alerts to your phone and for integrations like voice assistants.

Open the door when you're not home

From your smartphone, instantly unlock the door remotely for visitors and lock it behind them, no matter where you are.

Monitor access from anywhere

Always know who is coming and when, and if your door is locked or unlocked. Check your lock's status any time, from anywhere.

Enable integrations such as voice assistants

Use your Voice Assistant devices to unlock your door (using a PIN*), lock it securely and check the status of your Smart Lock at any time.

Yale Smart Keypad

Perfect for kids, guests, or your house cleaner to access your home without a traditional key or smartphone.

Easy to use for everyone

Perfect for guests, your dog walker, house cleaner, handyman, or tradesmen to access your home.

Know who comes and when

Keep track of who entered your home with unique entry codes for each guest.

Enjoy peace of mind

Rest assured that you can still unlock your door, even if you run out of battery on your phone or if you lose your smartphone or keys.

Yale Linus® Adjustable Cylinder

Depending on what cylinder is currently in your door, you may need to change it in order to be compatible with the Linus® Smart Lock. The Linus® Adjustable Cylinder is guaranteed to work with the Linus® Smart Lock.

6 pin sawn key cylinder

Anti pick

Anti drill

Anti bump

Anti pull (7 kN)

- EN1303 standard
- Classification code: 1 6 0 B 0 C 5 D
- Patent pending
- Available in Satin Nickel finish
- 2 keys provided along with security card

Internal cylinder lengths:

- 30mm minimum - 65mm maximum
- 5mm size increments

External cylinder lengths:

- 30mm minimum - 60mm maximum
- 5mm size increments

Sync Alarm Accessories

Yale Sync Alarm
Motion Detector
AC-PIR

The sensor will activate the alarm when motion is detected and will work up to 200m away from the smart hub.

Yale Sync Alarm
Pet Friendly Motion Detector
AC-PETPIR

The sensor will activate the alarm when movement over 25 kg is detected and will work up to 200m away from the smart hub.

Yale Sync Alarm
Door/Window Contact
AC-DC

When the door or window is opened, the contact and magnet lose connection, which activates the alarm.

Yale Sync Alarm
Keypad
AC-KP

Keypad can be used to arm, disarm or emergency trigger your alarm system. The disarming function is protected by the user's PIN code.

Yale Sync Alarm
Smoke Detector
AC-PSD

The detector triggers the alarm system and built in siren, when smoke, movement or a temperature change is detected.

Yale Sync Alarm
Key Fob
AC-KF

The key fob can be used to arm, disarm or emergency trigger your alarm system up to 200m away from the smart hub.

Yale Sync Alarm
External Siren
AC-BXG

Additional external siren for your Yale Sync Smart Home Alarm.

Yale Sync Alarm
Smart Plug
AC-PS-EU

The Smart Plug allows you to turn home appliances on and off remotely (i.e. lamp or radio) via the Yale Smart Living Alarm App.

Yale Sync Alarm
Lock Module
AC-LM

Unlock your door remotely and disarm your alarm automatically when you unlock your door.
